1. Project Planning.pdf

Project Name

Credit Card Approval Prediction Using Machine Learning

Project Objective

Develop a machine learning-based web application to predict whether a credit card application should be approved or rejected based on applicant information.

Project Scope

- Collect and preprocess applicant data.
- Train a machine learning model.
- Predict credit card approval status.
- Display prediction results through a Flask web application.

Project Deliverables

- Source Code
- Machine Learning Model
- Web Application
- Project Documentation
- GitHub Repository
- Final Presentation

Resources Required

Resource	Description
Programming Language	Python
Frontend	HTML, CSS
Backend	Flask
ML Library	Scikit-learn, XGBoost

Resource	Description
Dataset	application_record.csv, Credit_record.csv
Version Control	GitHub
Project Milestones	
Milestone	Status
Requirement Analysis	Completed
Data Collection	Completed
Data Preprocessing	Completed
Model Development	Completed
Web Application	Completed
Testing	Completed
Documentation	Completed
